# dash
ComplyOps

Cloud-native solution for building and managing a robust security and compliance program in AWS.

Set Custom Cloud Security Policies

Dash allows organizations to build security controls and compliance policies to set cloud security standards. Organizations can answer plain-English questions about their organization to build a custom set of policies to fit their organization and regulatory needs.

Enforce Security with Continuous Compliance Monitoring

Dash continuous compliance monitoring enables organizations to detect cloud security issues and compliance issues and provides steps for resolving issues within the cloud environment.

Automatic Remediation

Dash "click-to-fix" remediations allow security teams to easily implement proper security controls and resolve security issues with a single click.

Key Benefits

> Build on All 100+ AWS Cloud Services

> Lower Total Cost of Ownership (TCO)

> Lower Risk Profile

> Validate and Prove Compliance Efforts

> Mapped to Compliance and Regulatory Frameworks: HIPAA, HITRUST, SOC 2, NIST…

Simplify SecOps and ComplianceOps

📞 267-567-3552   📍 www.dashsdk.com   ✉ hello@dashsdk.com

How It Works

1. Organizations build custom security controls and administrative policies with Dash.

2. Dash monitors your cloud for policy and compliance issues.

- *Unencrypted EBS Volume*
- *S3 Bucket Open to the Public*
- *RDS cluster with backup disabled*

3. Dash provides teams with steps for resolving security issues with one click.

Mapped to Security Frameworks

HIPAA/HITECH:
Meet regulatory requirements in healthcare.

HITRUST:
Implement enterprise healthcare security standards.

SOC 2:
Build around the cybersecurity framework used by Fortune 500s.

NIST CSF / NIST 800-53:
Meet NIST baseline security standards.

Specifications

> Deployed as a CloudFormation Template/AWS Marketplace Offering

> Supports Multi-Account + Multiple Region

> Dash Security Events Are Connectable to CloudWatch and SIEM solutions

> Connects with Other Security Point Solutions

> Monitoring and Remediation Built Around Individual AWS Services

Cloud Compliance Experts

Dash ComplyOps is built around Amazon Web Services (AWS) and the cloud shared responsibility model. As an **AWS Advanced Technical Partner** and **Healthcare Competency Partner**, Dash has built around the latest cloud services and best security practices.
