

Introducing Dash ComplyOps

HIPAA Compliance Automation

Dash ComplyOps provides a unified platform for organizations to build, automate, and manage their [HIPAA/HITECH](#) security program. With Dash, teams can become HIPAA compliant, develop an extendable security program, and get-to-market quicker.

- ✓ **Become HIPAA Compliant In 30 Days –**
Dash enables teams to address HIPAA requirements and become compliant in less than 30 days.
- ✓ **Build Compliant Cloud Solutions –**
Cloud monitoring enables teams to build compliant solutions in the public cloud.
- ✓ **Connect Security And Compliance –**
Connect compliance standards with technical controls and keep Security and DevOps teams on the same page.
- ✓ **Manage Your HIPAA Security Program –**
Quickly see your compliance status and ensure HIPAA controls are up-to-date.

**Trusted By HealthTech,
Pharma, and SaaS
Innovators**

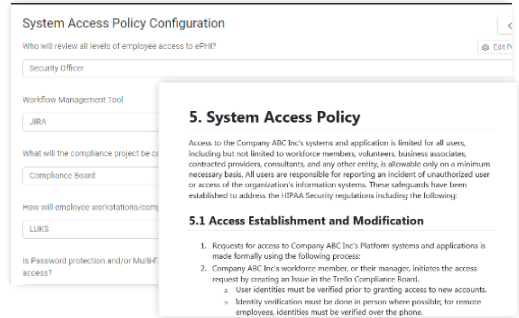

“Dash ComplyOps helped ensure that our market leading real-world vital data platform for healthcare providers and pharmaceutical clinical trials meet security and policy standards for HIPAA and GDPR compliance.”

Tom Wang, Vivalink

Steps to HIPAA Compliance

1. Create HIPAA Security Policies

Utilize [Dash ComplyOps](#) to quickly build 20+ compliance policies mapped to HIPAA security requirements. Quickly build policies by answering questions about your organization, tools, and technologies.

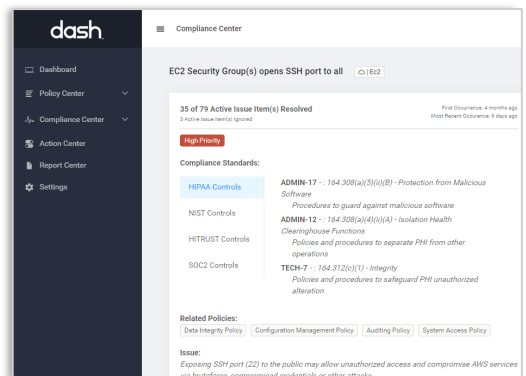

2. Connect Policies To Automated Controls

Connect Dash policies to automated technical controls and continuous compliance monitoring. Effortlessly ensure that your team has addressed all HIPAA technical requirements across your infrastructure.

| Security Policies | | Enforced Through Technical Controls | |
|-------------------|-------------------|-------------------------------------|--------------------------|
| Security Roles | Incident Response | ● Cloud Configuration | ● Audit Logging |
| Risk Management | Disaster Recovery | ● Networking | ● Users/Access Control |
| Employee Training | Breach Mgmt | ● Encryption | ● Intrusion Detection |
| System Access | Config Mgmt | ● Backup/DR | ● Vulnerability Scanning |

3. Maintain HIPAA Compliance

Use Dash ComplyOps to automatically inventory all security controls and cloud compliance evidence. Leverage security reports to manage your HIPAA program and answer security risk assessments (SRAs).

Dash ComplyOps Benefits

Leverage The Public Cloud

Build HIPAA compliant solutions on top 100+ AWS cloud services. Leverage instances, serverless, containers and more.

Grow Your Security Program

Dash enables your team to extend your security baseline to other compliance frameworks including HITRUST and SOC 2.

Monitor Security & Compliance

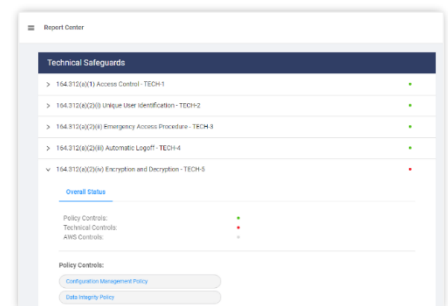

Dash ComplyOps continuous compliance monitoring enables your team to detect issues and maintain your security baseline.

Build Security Into DevOps

Implement security standards across your DevOps processes with source code and Infrastructure-as-Code (IaC) scanning.

Work With Compliance Experts

Work one-on-one with Dash compliance experts to customize your security program and build around your organization and technologies.
